

The Fifth Grade students have 3 options to tell Neitzel Sensei about their weekends (plus practicing their self-introductions). The requirements for this project are:

1. To introduce yourself
2. Tell some information about yourself (age, grade, where you live, likes, etc.)
3. Tell a few things about what you did on the weekend, the previous day, during the week, etc.

You have "3" ways that you can communicate this information to Neitzel Sensei.

There are samples of the 3 options on our wikispace at the address below:

www.clovisjapanese.wikispaces.com/Grade+5

Here are explanations of the 3 options below:

1. You can call her on the "google" voice number and leave her a message at this phone number: **(920) 659-0097**. This is a free phone call. Listen to the short instructions on the phone and leave your message. Be sure to listen to the message after you give your information in Japanese to make sure your message is saved.
2. You can create an online animated person (avatar) that has the ability to enable you to record own voice message onto. Follow the instructions below to ensure that you save and publish your Voki correctly. The log in e-mail and password are listed below as well.

Log in e-mail: clovis4v@gmail.com
Password: clovis

1. After you create (and add voice to your Voki), be sure to save it with your first name and 5Kr, 5Ku or 5W (no last names please).
2. The 2nd important step is to always "publish" your Voki at the very end so that it is saved on the website.

3. You can be videotaped with the Flip Camera during class time with the help of a friend. This can be done during the last 5 minutes of any class.

PROJECT DEADLINE: Monday, DECEMBER 10th

*******An important note to Parents/Guardians:** As always, it is best to be with your children when they are using the computer. Let your child show you what they can do with their skills in both the areas of Japanese and Technology!
